

## **FAMA Education Committee**

To: FAMA Spring Meeting Attendees

Re: Another Great Reason to Attend in Key West

Dt: Feb 10, 2010

The Education Committee's on-line survey was conducted in the fall of 2009 and was intended to solicit information from fire departments in the US and Canada. The objective was to report on key issues facing fire departments and to better understand "how those issues will impact apparatus purchasing." Over 1,200 responses were received from departments in both the US and Canada exceeding the target of 1,000 completed surveys. Data is currently being analyzed and will be available this spring. Members attending the spring meeting will get the first chance to review the data and also receive some in depth commentary on the survey results.
